CITY OF BURIEN

Dear City Council members,

Tired of being called SEATTLE?

My family and I have lived in Tukwila for 17 years. I have a lot of pride about this city and enjoy it. The point of this letter is to help with an economic promotion of our fair city and to make things right.

All of us have experienced, filling in a form online or ordering something over the phone and the response is "Seattle". "So, 98168 ...you live in Seattle." "No. I live in Tukwila" "But for 98168 (98188) my computer says you live in Seattle!" "Fine ...Seattle. but I live in Tukwila." So for years, we just tell people we live in Seattle. This is because all 981..'s is for the Seattle postal district. If we were a 980...something, like Kent or Redmond, the computer would say Tukwila!

In 1971, according to a Tukwila history expert, we were given the option for our own 98068 zip code for our city, but a prominent company then (GE...which was where Lowe's is now) said no way...nobody knows who Tukwila is!

All of these zip codes are not in use at this time: 98067, 98088, 98098, and 98066. 98068 are being used for a small segment in Snoqualmie Pass P.O. Boxes, they could easily be given up or we could use 98067, which is not being used. SeaTac could have its own 98088, Burien could have its own 98066 and Des Moines could have its own 98098.

Also, half the businesses here in Tukwila use the return address city as "Seattle" not Tukwila.

My thoughts are to somehow give these businesses incentives to use Tukwila.

The more we get the name "TUKWILA" out there...the more people will want to move their business here or move into our cities many vacant houses or apartments.

thank you!

Tired of being called SEATTLE;

Randall Stephens

Tukwila, WA 98067

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for consistent data collection procedures and the use of advanced analytical techniques to derive meaningful insights from the data. This section also discusses the challenges associated with data integration and the importance of data quality.

3. The third part of the document focuses on the application of the collected data to inform decision-making. It provides examples of how data analysis can be used to identify trends, forecast future performance, and optimize resource allocation. The text stresses the importance of communicating the results of the analysis to the relevant stakeholders in a clear and concise manner.

4. The fourth part of the document discusses the role of technology in data management and analysis. It explores the use of cloud-based storage solutions, data visualization tools, and artificial intelligence to streamline the data process and improve the accuracy of the results.

5. The final part of the document provides a summary of the key findings and recommendations. It reiterates the importance of a data-driven approach and offers practical advice on how to implement the discussed strategies effectively.

6. The document concludes by emphasizing the ongoing nature of data analysis and the need for continuous improvement. It encourages the organization to stay up-to-date with the latest trends and technologies in the field of data science to maintain a competitive edge.
