CITY OF BURIEN

To: The Burien City Council
400 SW 152nd St., Suite 300
Burien Washington 98166

As a citizen, I am requesting the Burien Shoreline Master Plan clearly state that there will be no **Physical Public Access to Lake Burien.**

Physical Public Access to Lake Burien by thousands of people will irreversibly damage this lake. We have perfect examples of the kind of irreversible damage that occurs in small lakes by simply looking at Hicks Lake and Arbor Lake - neighboring lakes and numerous other small lakes in King County.

Physical Public Access, by thousands of people using a small lake, brings these ecologically damaging issues with it:

1. the introduction of invasive weeds that choke off the waterway, destroy oxygen levels in the lake and destroy wildlife,
2. the introduction of inappropriate gas levels into the water column that damages water quality, destroys wildlife and encourages the growth of toxic (like red tide) plankton populations,
3. the introduction fecal (poop) material to the lake that destroys water quality, destroys wildlife, encourages the growth of fecal coliform bacteria and creates a health and safety issue for humans,
4. introduced boating contamination, speed and density issues that create habitat destruction and trauma to wildlife as well as serve as contaminators and spreaders of infection and noxious weeds (Eurasian Milfoil, etc.) to the lake and animals (quagga mussel, zebra mussel, New Zealand mudsnail, rusty crawfish, spiny water flea, snail fever organism, etc.),
5. exceeding the carrying capacity of the land and water by the introduction of thousands of humans, their pets and their wastes/litter to the delicate lake ecosystem, and
6. the increased turbidity to the water by just the sheer number of people entering it which results in degradation of water quality and destruction of habitat for spawning fish, nesting wildlife

Research shows that small lakes that are opened to physical access, within two years of having physical public access, have problems with invasive species and fecal coliform problems. These are problems that require chemical treatment and poisoning to lake waters to attempt to correct. In most cases they cannot be remedied without significant damage to the ecosystem. **Lake Burien is the last healthy small lake along the Urban Corridor. Do not allow this to happen to it. Do not allow physical public access to Lake Burien.**

Sincerely,

BARRY CRITTENDEN

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud. The text also mentions the need for regular audits and the role of independent auditors in ensuring the reliability of the data.

2. The second part of the document focuses on the role of the central bank in maintaining the stability of the financial system. It discusses the various tools and policies that the central bank can use to influence the money supply and interest rates. The text also highlights the importance of the central bank's independence and its commitment to price stability.

3. The third part of the document addresses the challenges faced by the financial system in the context of globalization and technological change. It discusses the need for international cooperation and the role of international organizations in promoting financial stability. The text also mentions the importance of strengthening the regulatory framework to address the risks associated with new financial products and services.

4. The fourth part of the document discusses the role of the private sector in the financial system. It emphasizes the importance of sound corporate governance and the role of shareholders in ensuring the long-term success of the company. The text also mentions the need for transparency and disclosure of financial information to investors and the public.

5. The fifth part of the document discusses the role of the government in the financial system. It discusses the various policies and programs that the government can use to promote financial stability and growth. The text also mentions the importance of the government's role in providing a sound legal and regulatory framework for the financial system.

6. The sixth part of the document discusses the role of the international community in the financial system. It discusses the various initiatives and programs that have been launched to promote financial stability and growth in emerging markets. The text also mentions the importance of international cooperation and the role of international organizations in promoting financial stability.

7. The seventh part of the document discusses the role of the financial system in the economy. It emphasizes the importance of the financial system in providing capital to businesses and households and in promoting economic growth. The text also mentions the need for a well-developed financial system to support the economy's long-term growth and development.
