Subject: June 20th meeting

Council members,

I would like to express gratitude for the comments made at last night's meeting regarding White Center. I watched the meeting on my computer last night and for the first time I heard positive statements about our Community. I first listened to the Burien people who were against Annexation and how those people would be better served by Seattle, I slowly sunk in my chair as I heard people talk about me as a resident of White Center. If people could hear their selves talk and realize that they can sound so degrading without meaning to. I sat back up in my chair with pride when I heard the Council members one by one speak positively about North Highline and say how there are those that are hard working tax paying citizens and our businesses are doing well.

I grew up in Seattle, I currently work in Seattle and I know what their plans are. Right now we are being hit left and right by groups who are saving one person at a time with housing but obviously do not want it in their own backyard. With no real government to stop them, I hate to think what this community will be like in 10 years.

I just again want to thank you all for your positive statements and making me feel proud to live in White Center.

Rebecca Lopes
North Highline Resident
