**Subject:** Live-trapping of wild animals

First of all, thank you so much for providing this email link to the entire council. It is greatly appreciated.

I completed a request to CARE for a live-animal trap to be placed on our property to catch hunting coyotes. We have sighted them, their scat, and the body parts of neighborhood cats.

We are part of the green-belt corridor that runs parallel to Puget Sound, from SW 151st Pl (private road) to Seahurst Park. We are pretty sure there is a den in the area, and the female is feeding her young. We appreciate her doing that, but if she cannot stick to rats and raccoons, perhaps they could be relocated.

Thank you for considering. We are telling folks to keep their cats and small dogs indoors.
