**Subject:** Transients on off-ramps

Attached are some photos I took of the transients and their garbage that they leave at 128th and 509. We now have them setting up couch cushions under the freeway so they can hang out all day every day. In one photo you can notice they walk up and down the freeway off ramp panhandling. This is illegal to be on the off ramp but not on the sidewalk under current rules.. They also do this on 148<sup>th</sup> and 509. I have asked something be done about this for years now. Will the council make a no loitering rule near off -ramps? My neighbors and I have suffered with these people and the beer cans and garbage they leave throughout the neighborhood for years now. I have volunteered in this neighborhood for years trying to clean it up and spent 1,000's of hours as Public works and The Parks Dept. can verify. I need help. I am tired of picking up after them and don't feel like I should have to. Please take action now. Mark Zink 12413 2nd Ave. S. Burien Wa. 98168

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for the company's financial health and for providing reliable information to stakeholders. The text also mentions the need for regular audits to ensure the integrity of the data.

2. The second part of the document outlines the various methods used to collect and analyze data. It describes how different types of information are gathered and how they are processed to identify trends and patterns. This section highlights the use of advanced software tools to facilitate data analysis.

3. The third part of the document focuses on the role of management in overseeing the data collection and analysis process. It discusses the importance of setting clear objectives and providing the necessary resources for the team. The text also mentions the need for ongoing communication and collaboration between different departments.

4. The fourth part of the document discusses the challenges faced in the data collection and analysis process. It identifies common issues such as data quality, incomplete information, and the complexity of the data itself. The text offers suggestions for how these challenges can be overcome through careful planning and implementation.

5. The fifth part of the document discusses the benefits of a robust data collection and analysis system. It highlights how this system can provide valuable insights into the company's performance and help in making informed decisions. The text also mentions the importance of data security and privacy in this context.

6. The sixth part of the document discusses the future of data collection and analysis. It mentions the increasing use of artificial intelligence and machine learning in this field. The text also discusses the importance of staying up-to-date with the latest technologies and trends in the industry.
